ALUMINUM PIGMENT TT-P-320D

PRODUCT

A government specification, aluminum pigment in powder or paste form for paint.

DESCRIPTION

TT-P-320D is an aluminum pigment for use in paint and coatings. Available in powder or paste forms.

PROPERTIES

Non-Volatile By Weight:

Type I	Minimum 99%
Type II	Minimum 65%

Leafing Properties:

Class A	50 - 55%
Class B	50%
Class C	40%

Type I: Aluminum Pigment - Powder Form

Class A	Extra Fine Lining
Class B	Standard Lining
Class C	Standard Fineness

Type II: Aluminum Pigment - Paste Form

Class A	Extra Fine Lining
Class B	Standard Lining
Class C	Standard Fineness

Use: Add into base paint and coatings as needed for aluminum color pigmentation. Normally a minimum of a pound of aluminum pigment per gallon of base is needed for good opacity.
